Howdy Ags!

I am writing to inform you of a policy instituted by Qatar Foundation and the branch affiliates regarding the requirements for immunizations and submitting documentation of immunizations and/or immunity to certain diseases. This policy is described below and went into full effect August 1, 2009.

The mission in the Department of Student Affairs Counseling and Wellness Program is to keep healthy students healthy! Our website is a great place to get information about what's happening in the world of wellness at Texas A&M at Qatar and Education City! We have information about exercise classes and facilities, anxiety and stress management, counseling, self-help information, and wellness topics. Take some time to visit our website at http://www.qatar.tamu.edu/counseling/default.aspx so that you will be informed about how to stay healthy this coming semester.

Related to health and wellness is the matter of obtaining and recording the immunizations and vaccines you have had over the years. Qatar Foundation and Texas A&M University at Qatar respectfully require that you complete the attached Student Health and Immunization Record.

Every incoming and current student who attends a branch affiliate must submit proof of certain vaccinations/immunizations (i.e., copy of childhood or current immunization records) and/or proof of immunity (i.e., copies of the blood titer results) to their respective Counseling and Wellness staff.

This information must be compiled and confirmed by your Health Care Provider in English. If you do not have the documents in English, you may have them translated. Translations of non-English documents must be certified. This policy went into effect August 1, 2009. The required vaccinations are described in the document which is included with this letter (Immunization and Tuberculosis Screening Certificate).

I am requiring you to return the appropriate documents before you begin classes at Texas A&M at Qatar. Please submit them by July 14, 2011. You will be blocked from registering for classes until you are in complete compliance with the Qatar Foundation policy.

There are three ways you can return the information to the Counseling and Wellness Program 1) drop them off in our respective office (suite 318); 2) scan and email the forms/copies to immunizations@qatar.tamu.edu; or 3) fax the forms and copies to us at +974.4423.0011.

If you should become ill while on campus, the health history provides background information that helps us to provide care which meets your individual needs. The immunization information helps us to protect you and the community against vaccine-preventable diseases. While you will be able to complete the health information on your own, you will need your health care provider to verify when the immunizations were administered or when you contracted the illness.
(e.g., chicken pox), or provide the blood test results as proof of your immunity to a disease. I have also included some information about the importance of vaccinating, meningitis, and HIPAA (Health Insurance Portability and Accountability Act of 1996, United States of America Federal law). You should know that your privacy is important to us and will be protected. This information will be stored with the Counseling and Wellness staff and used, if necessary, solely as an aid to provide health care while you are a student in Education City. It is strictly for use by qualified professionals if and when needed and will not be released to anyone without your knowledge and consent, following HIPAA rules and guidelines. If you have questions about your records and the privacy of your records please contact immunizations@qatar.tamu.edu.

Thank you for your anticipated attention to this matter. If you have questions, please contact the Counseling and Wellness Program staff via email immunizations@qatar.tamu.edu.

All of this information can also be accessed via the Counseling and Wellness Program website at http://www.qatar.tamu.edu/counseling/default.aspx. The website has some useful handouts of interest related to this topic and other health and wellness topics.

Sincerely,

Dr. Steve Wilson
Psychologist
Interim Health and Wellness Coordinator
Department of Student Affairs
Texas A&M University at Qatar
